

PARROT.AI

Chatbots based on your favorite people (or characters!).

ABOUT

Parrot.AI strives to bring your favorite people (or characters!) to the reach of your thumb by transforming them into your own personal AI companion. Using data from conversations we can create a chatbot that speaks just like your favorite actor, singer, and even fictional character! Parrot.AI is simple to use service, requiring minimal input from the user. We hope you enjoy our service and think about getting your very own Parrot based on your favorite character (or person!).

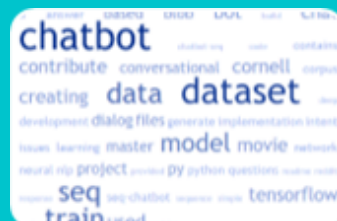

SERVICES

- AI creation based on your favorite character or person.

- Web integration assistance for other businesses

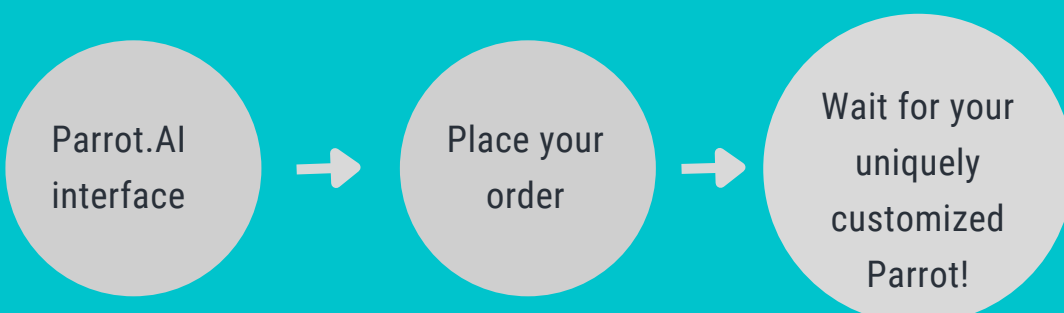

- Dataset acquisition assistance.

OBJECTIVES

- Imitate the behavior of the chosen character as faithfully as possible, using artificial intelligence.
- Optimize customer service
- Allow you to configure your own chatbot and adapt it to your needs in a simple way.
